CHECKLIST

Property Contamination Survey Checklist

- [ ] Walk the property and divide it into numbered zones on a sketch
- [ ] Plan your route from farthest zone to exit
- [ ] Take an outdoor baseline reading and record the value
- [ ] Scan each zone's floors, horizontal surfaces, walls and objects in overlapping passes
- [ ] Mark and record every hot spot without touching it
- [ ] Return to hot spots for one-minute static measurements
- [ ] Calculate average count rate for each zone
- [ ] Compare zone averages to your baseline
- [ ] Document findings, photographs and contaminated item locations
- [ ] Repeat outdoor baseline reading after survey to check for detector drift
